

SUMMARY

Highly driven and analytical bilingual Software Development Engineer holding a BA and MS in Computer Science, with over five years of full stack software development using cutting-edge technologies (C/C++, Java, Python, Swift, bash, R, Android) for well-known institutions, such as Harvard Medical School and Loyola University Chicago. Possesses various technical abilities in software development, web development, database management skills. Committed to delivering innovative solutions that optimize efficiency and exceed customer expectations. Experienced in project leadership, team supervision, and developer training.

TECHNICAL SKILLS

- **Programming/Scripting languages:** C/C++, Java, Python, Swift, bash, R, Android
- **Web development:** HTML/CSS, PHP, JavaScript, AJAX, WordPress, Flask, and Django
- **Database management systems:** SQLite, MySQL, PostgreSQL, MongoDB, and Firebase
- **Operating Systems:** Ubuntu, Kali, Windows, MacOS
- **Command-line environments:** Linux and MS-DOS]
- **AI/ML Platforms:** OpenAi, Anthropic, Hugging Face

CAREER BACKGROUND

[Loyola University Chicago](#), Chicago, IL

April 2021 – Present

Private Jesuit Catholic research university located in Chicago, Illinois, United States. Ranked in top 100 Best National Universities.

➤ **Role: Web Developer (Remote Freelancer) | August 2023 – Present**

- Coded, designed, and maintained the website www.sojkalab.com using Agile Methodology.
- Conducted rigorous testing and debugging to identify and resolve issues, ensuring cross-browser compatibility and optimal site performance.
- **Achievements:** Followed best web development and design practices to create a visually appealing and functional website that met the client's standards. Ensured timely updates to the website, keeping stakeholders informed about events, news, and any changes within the laboratory.

➤ **Role: Computer Science Teaching Assistant (Hybrid Part Time) | August 2022 – December 2023**

- Support professors and faculty members with class dynamics throughout the semester.
- Conduct laboratory work, in-class assignments, and graded class material and exams.
- Serve as an exam proctor, ensuring a fair and secure student testing environment.
- **Achievements:** Provided valuable support to professors by contributing to a positive and effective learning environment and enhancing the hands-on learning experience for students.

➤ **Role: Web Developer (Onsite Full Time) | April 2021 – August 2022**

- Managed and updated the existing website for the Computer Science Department www.luc.edu/cs.
- **Achievements:** Conducted technical maintenance activities, addressing any issues or bugs on the website to maintain its functionality and performance. Implemented improvements to enhance the user experience, making the website more user-friendly and accessible for students, faculty, and visitors.

PiHRate, United States

March 2021 – February 2022

A startup providing tools that enhance recruiters' efficiency and effectiveness.

➤ **Role: Lead Software Developer (Remote Freelancer)**

- Worked as a Python full-stack developer and led the automation of HR processes based on a data-driven approach using Agile Methodology.
- Led and managed a team of software developers, providing technical guidance, mentorship, and support to ensure successful project execution.
- Oversaw design, development, and maintenance of complex software systems and applications, ensuring adherence to coding standards, best practices, and project timelines.
- Actively participated in the software development process, contributing to code reviews, architecture discussions, and problem-solving sessions.
- Assumed a hands-on role in software development, utilizing languages and technologies like Python to create robust and scalable software solutions.
- **Achievements:** Automated HR processes through a data-driven approach, significantly enhancing efficiency and reducing manual workload. Led and managed a team of software developers, providing guidance, mentorship, and support to foster a collaborative and high-performing work environment.

[Gemela](#), Norton, MA

February 2017 – February 2020

GEMELA strives to unite scholars across traditional disciplinary boundaries by focusing on women's cultural production in medieval and early modern Spain and colonial Latin America through 1800.

➤ **Role: Front End Developer (Hybrid Freelancer)**

- Developed a user-friendly website that fixed vulnerabilities while providing support and customer service.
- Participated in weekly meetings with Executives and supported brainstorming and idea generation.

- Trained and educated staff in internal web functions, including independently making minor updates and changes.
- **Achievements:** Improved cybersecurity and customer service through collaborative efforts with Executives for strategic planning. Streamlined knowledge-sharing and built internal capabilities by training the staff.

Harvard Medical School, Boston, MA

August 2019 – November 2019

Harvard Medical School is a prestigious school, part of the Ivy League Harvard University. It is known for its research, medical education, and contributions to advancements in healthcare.

➤ **Role: Front-end Developer (Hybrid Freelancer)**

- Collaborated with the client to design, structure, and implement improvements to the existing website.
- Participated in meetings with the Principal Investigator and supported brainstorming and idea generation.
- **Achievements:** Proactively identified potential risks during the design and implementation phases, implementing mitigation strategies to prevent issues. Demonstrated effective problem-solving skills when challenges arose, ensuring project continuity. Collaborated with departmental stakeholders to gather feedback and suggestions for website enhancements, fostering a more collaborative and responsive online platform.

Daggett Crandall Newcomb Home, Norton, MA

March 2016 - April 2016

Elderly-Care Residence.

➤ **Role: Web Developer (Remote Freelancer)**

- Collaborated closely with stakeholders to spearhead the comprehensive redesign of the company's website, aligning it with modern design trends and enhanced functionality.
- Offered valuable advisory services to the client, leveraging my expertise in web development to provide strategic guidance and innovative solutions.
- Implemented Agile Methodology to streamline project management, ensuring efficient communication and delivering high-quality results on time and within budget.
- **Achievements:** Successfully implemented innovative solutions within the website redesign, showcasing creativity and adaptability in overcoming challenges and meeting project objectives. Achieved high levels of client satisfaction by consistently delivering quality outcomes and building strong, trust-based relationships through effective communication and understanding of client needs.

ACADEMIC & PERSONAL PROJECTS

- **Principal Software Developer, Loyola University Chicago, Chicago, IL** (Aug 2021 - Dec 2023). Developed an Android application, DriveAware, to collect crime data and maximize user experience and efficiency. App available at the PlayStore. Developed a Python program to analyze data collected from DriveAware, all using Agile Methodology. Posted a presentation of the project at Loyola eCommons titled Computer Science Research Seminars and Symposia: DriveAware: Generating Actionable Data through Vehicle-Based Citizen Science.
- **Software Developer, Sparkbadge, Chicago, IL** (Mar 2021 – Aug 2021). Collaborated on a team to develop longitudinal status badges for GitHub projects using Agile Methodology. Developed a Sparkbadge for the size of the repository over time.
- **Full Stack Software Developer, Computer Science Department at Wheaton College, Norton, MA** (Jan 2018). Developed a dictionary-based content analysis algorithm and implemented unit tests using Agile Methodology.
- **Full Stack Web Developer, French Department at Wheaton College, Norton, MA** (Aug 2017 – Dec 2017). Developed an interactive website for students to practice pronunciation. kanderson.webspace.wheatoncollege.edu.
- **Software Developer, Chemistry Department at Wheaton College, Norton, MA** (Aug 2017 – Dec 2017). Collaborated with the chemistry department to create a user interface for a drEEM MATLAB script using Agile Methodology.
- **Software Development Researcher, Wheaton College Massachusetts, Norton, MA** (Sep 2016 – Dec 2016). Software Development Researcher at the student group called GluGo. Developed an iOS mobile application and designed the company name and logo.
- **Software Development Researcher, Wheaton College Massachusetts, Norton, MA** (Jun 2016 – Jun 2019). Python Development Researcher at the student group called Lexomics Research. Collaborated with an interdisciplinary team of English scholars & programmers to refactor a Django app for digitized text mining. Set up and administered the new Ubuntu Linux server and implemented unit tests and test cases. Refactored the implementation of hierarchical clustering algorithms and K-Means clustering visualizations (Voronoi & PCA). Developed “Keep Words:” an algorithm that efficiently deletes all the words in the corpus that are not in the list. Developed a dictionary-based content analysis algorithm.
- **Full Stack Developer, TBookSwap, Los Altos Hills, CA** (Dec 2015). Designed and developed a website to streamline textbook exchange between college students.

EDUCATION

- **Master of Science, Computer Science, Merit Award** | Loyola University Chicago, Chicago, IL (Aug 2020 – Dec 2023)
- **Bachelor of Arts, Computer Science** | Wheaton College, Norton, MA (Jan 2016 – Feb 2018)
- **Computer Science Courses** | Foothill College, Los Altos Hills, CA (Jan 2012 – Dec 2015)
